

"Not What We Have But What You Want"

THE START

The Home Bureau in 1890 started without capital. In one room with one employee, for the sole purpose of supplying delicacies for the sick.

NOW

The Home Bureau is installed in a five-story building; has six specialized departments and holds the unique position of being the only general Medical House in the World.

My dear Harry:-

Have been intending to write you ever since my return, but it is so very easy to put off writing, and I am guilty more than often,

I looked over my canceled checks when I got home and of course did not find one I had sent to William, will try to write him an apology as soon as he gets settled in his new home, I felt very bad about it as I was so sure I had sent it as soon as I got to Athens, cannot imagine why it went astray,

Business has been rather slow since my return, now that October is nearly here guess it will start in,

I am thinking of taking typing and short hand I had a doctor say to me if I learned the two things ^{machine} he would give me a job, right away, so I decided to start to writing on this article right away quick, I used to do real well on it, some time ago, I find I can do it now with some practice, and with these accessories can get a better paying job and one needs so much money up here, so if I get in any ready cash I will put a little on this horse can do it after hours. take my time and wear myself out, that I will not do,

How does Harry Jr. like school and does Nance teach him? hope so, she would take such an interest in him, always says she is crazy about him he is so cute and bright, tell him I would love to see him.

Tell Memory to write me one of her interesting letters, I would enjoy one very much at present, I always miss the home folks alot when I return to the city, miss running to the neighbors, and the family,

I see Miss Lee has a guest do not see how she entertains any one she has cut herself off from all the people worth while at home, guess she rather likes to be alone so "we should worry,"

I commenced this last evening, some one is occupying the room the type writer in it so will finish with the old time mapour - we have had a Pressman's strike, feel we are out of the world, with no news of the outside, do trust it is fixed up & we get our paper tomorrow.

ADDRESS ALL COMMUNICATIONS TO THE COMPANY, NOT TO INDIVIDUALS

I never see the Fair advertisements I do not long to be there, always enjoyed them hope this one will be a success.

How does William like his new job, a lady here from Florida, says Jacksonville is a wonderfully progressing place, and is quite an enthusiast on the subject.

I'm sending you John's note as it originated & the .05% calculated by you & 8 yrs. & etc. subtraction of the amount he paid, calculate it yourself & see if I have made any mistake, and correct them. I hate to hoggle my money, but it seems to me I am apt to come into the little end of the horn. Lots of good wishes for your success, & may all things right themselves. I'm frat.

Wm. L. G.
