Dr Harry:

I wanted take you off to one side yesterday while in Athens & thank you for your publications & editorial in last week's issue; when you stop to think that there are hundreds of homes in our county in which no paper or periodical enters except the county paper, - then it is that you can appreciate or estimate our appreciation of your ideas & timely warnings thru the columns of your papers; in fact your editors are only human after all, & we fail or forget to tell you of the good you do, until you, like the rest of us get to think there is not much good in you; - but I tell you not so, - you are on power behind the throne, & we lean on you, & need every word, so just keep on keeping on, - and if you just won't believe we do honor you, just try climby once & see if we don't pile up flowers on you & say; personally I want to hand you my little flower right now - you are a plum good one Jno R Witt
